***Examiner's Amendment and Reasons for Allowance***

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
2. Authorization for this examiner's amendment was given in a telephone interview with Mr. Mark Henry on 5/23/05.
3. Applicant is reminded of the proper language and format for an abstract of the disclosure. The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. The abstract has been further amended as follows:

A method for displaying location-dependent bookmarks ascertains a location for the computer. For this location, corresponding bookmarks are determined and displayed on the computer. An advantage of the location-related bookmarks is that the user does not need to search for the appropriate addresses on the (mobile) computer, but rather is offered the correct ones quickly. The related access to the data associated with the bookmarks increases the acceptance when handling the computer to the same extent as the efficiency is increased.

Claim 28 has been amended as follows:

28. A system for displaying location-dependent bookmarks, comprising:
  - a) a locator to ascertain a location of the computer; and

Art Unit: 2174

b) a unit to ascertain bookmarks corresponding to the location of the computer and ~~display the bookmarks, to obtain time information, to filter the bookmarks using the time information, to display the bookmarks, and to store the bookmarks with the location information.~~

4. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to anticipate or make obvious the claimed invention.

Specifically, the prior art fails to teach, in light of the specification:

displaying location-dependent bookmarks on a computer comprising ascertaining a location of the computer, determining time information, ascertaining bookmarks corresponding to the location, filtering the bookmarks using the time information, displaying the bookmarks and storing the bookmarks with location information as recited in claims 11 and 28.

Although Dowling and Want et al. teaches a substantial amount of the claimed matters, they fail to anticipate or render the above underlined limitations, in combination with the remaining elements, obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
